

Abstract

The seat assembly includes a seat cushion. A front leg is pivotally coupled to the seat cushion for movement of the seat cushion between a seating position and a forwardly dumped position. A support bracket is pivotally attached to the front legs at lower portions of the front legs. A track assembly is attached to the support bracket. The track assembly is secured in a lateral orientation to a floor of a vehicle with respect to the seat assembly; whereby the seat assembly may be moved to a plurality of positions within the vehicle.
